79. A method of sharing virtual folder items stored in a file system of an operating system, the method comprising:

storing a plurality of items in a file system of an operating system located on a user's computing device;

storing in the operating system one or more values corresponding to operating system properties for each of the plurality of items stored in the file system;

displaying via the operating system a data object corresponding to a virtual folder comprising one or more of the items stored in the file system, wherein the virtual folder comprises a location-independent view of said one or more items;

receiving via the operating system a user request to share one or more of the items in the virtual folder with one or more sharees, wherein sharing the one or more items comprises allowing direct access to the user's computing device on which the one or more items are stored; and

setting permissions on the one or more shared virtual folder items to provide the one or more sharees direct access to said shared virtual folder items stored in a file system on the user's computing device, wherein setting permissions comprises setting an operating system permission property on each of the one or more shared virtual folder items.

91. One or more computer readable media storing computer-executable instructions which, when executed on a ~~computer system~~ user's computing device comprising an operating system, perform a method of sharing virtual folder items stored in a file system of the operating system, the method comprising:

storing a plurality of items in a file system of an operating system located on a user's computing device;

storing in the operating system one or more values corresponding to operating system properties for each of the plurality of items stored in the file system;

creating via the operating system a data object corresponding to a virtual folder comprising one or more of the items stored in the file system, wherein the virtual folder comprises a location-independent view of said one or more items, and further wherein the location-independent view is based on metadata associated with the one or more items;

displaying via the operating system a ~~the~~ data object corresponding to ~~the virtual folder comprising one or more of the items stored in the file system,~~ wherein said virtual folder is navigable according to one or more arbitrary parameters independent of said file system;

receiving via the operating system a user request to share one or more of the items in the virtual folder with one or more sharees, wherein sharing the one

or more items comprises allowing direct access to the user's computing device on which the one or more items are stored; and

setting permissions on the one or more shared virtual folder items to provide the one or more sharees direct access to said shared virtual folder items stored on the user's computing device, wherein setting permissions comprises setting an operating system permission property on each of the one or more shared virtual folder items.

103. A method of sharing virtual folder items stored in a file system of an operating system, the method comprising:

storing a plurality of items in a file system of an operating system located on a user's computing device;

identifying a virtual folder comprising one or more of the items stored in the file system, wherein the virtual folder comprises a location-independent view of said one or more items;

receiving at the operating system a request to share one or more of the items in the virtual folder with one or more sharees; and

in response to the sharing request, setting by the operating system user-access permissions on the one or more shared virtual folder items in the file system, the user-access permissions designating permission levels for the one or more sharees on the one or more shared virtual folder items.
